ABOUT ME.

Personal Background

Born here in Davao City on June 15, 2005. The environment that has surrounded me here growing up has shaped into what I am now, my hobbies, interests and the lot.

Hobbies and Interests

I enjoy playing games when I have free time, though I still play even when my time is not-so free. I like watching videos related to engineering/automotive/aeronautics etc. I also like listening to music every now and then as it relaxes me.

SKILLS

Problem Solving, Critical Thinking, Adaptability, Communication, and Teamwork are some skills I possess on a certain level. To be able to analyze, think outside the box, adjust, convey ideas, and collaborate are essential in any situation.

GOALS

Hands-on real world experience, Applying theoretical knowledge to practical spaces, and Expanding connections are some short term goals of mine as these will be the foundations of which my long term goals will be based on.

Contributions to society and environment, Financial Stability, and being successful in my field are some of the long term goals I wish to achieve as sucessful and professional engineer.

INSPIRATION.

"When everything seems to be going against you, remember that the airplane takes off against the wind, not with it." *-Henry Ford*

This quote resonated with me as it shows that no matter how hard or challenging an obstacle is, face it head on because eventually you are going to get over it

THANK YOU

To anyone who's reading this, thank you for taking the time to read this and I hope you'll have a wonderful day. :D
